

Phys. 137B H.W. #1

Griffiths edition #3: 5.4, 5.5(b), 5.8

Note: All of the Griffiths problems assigned in this course will be from *Griffiths edition #3*. These are different from the problems in Griffiths edition #1 & 2 as well as the Griffiths International edition. Please make sure that you have the problems from edition #3. If you have edition #2 then you can use the “problem translator” to see how the problems can be converted between these two editions. I don’t know if there is a translator for edition #1... Let me know if you want me to ask Griffiths for that....
